(54) Title: A MEDICAL DISPENSER, A BLISTER CARD FOR USE IN THE DISPENSER AND A METHOD OF DISPENSING
MEDICAL DOSES

(57) Abstract: A medical dispenser adapted to inform a user of when to take medication, detect when the user accesses the medication and inform the user of his/tiers compliance to a medication schedule. The dispenser may inform the user with differing manners of informing (sound, light, vibration, higher or lower frequency or intensity) depending on the users compliance. Blister cards for use in the dispenser may be coded in order to inform the dispenser of a medication schedule, a desired compliance level, etc. The user may himself code the blister card. The dispenser may hold a blister card or may be adapted for providing medical doses for inhalation or injection.
